DEPRAG

**EU-Guidelines WEEE
and RoHS,
as well as ElektroG**

Screwdriving Technology

Automation

Air Motors

Industrial Power Tools

DEPRAG SCHULZ GMBH & CO. is registered in the German National Register: Electro-Altgeräte-Registers (EAR) with the WEEE-Registration No. DE 47551563.

Electric, handheld Screwdrivers, as well as the Torque Measuring Instruments for manual use, fall within the European guidelines of **WEEE** and **RoHS**, according to the German law **ElektroG** effective October 20th, 2015 and the German **ElektroStoffverordnung** effective May 09th, 2013 respectively.

To conform to the requirements of the above regulations, we enter into the following agreement with our customers:

- Since we exclusively ship to industrial customers that utilize their own recycling methods, we hereby transfer the recycle responsibility to the buyer of the above-mentioned products. This option is clearly shown in the German law **ElektroG**, in the business-to-business section.
- The customer assumes the responsibility to reuse, recycle or recover the items in question and – when no longer used – disposes of them, at his own cost, in accordance with the legal regulations.
- The customer and any subsequent 3rd party releases DEPRAG from any disposal obligation as stated in §16 of the **ElektroG** (obligation to take back of the manufacturer).
- The right of exemption granted by the customer does not fall under the statute of limitations until the expiration of two years after the definite end of using the product. The two-year limitation period starts with DEPRAG's receipt of a written notice regarding the end of using the product.
- If the disposal responsibility is not a acceptable solution for you, then we can offer the following alternative solutions: DEPRAG accepts the freight-prepaid return of the product – after end-of-use – and disposes of the product in accordance with the legal regulations.

Principally, we ask our customers to recycle all tools using the same method as with the electric tools and while complying with all relevant legal regulations!

This way, the expenditure remains minimal for both sides.
